DETAILED ACTION

Applicant's amendment dated 04/06/2009 has been received and entered. Claims 1, 3, 20-25, 27-28 and 57 are pending in the application.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1, 3, 20-25, 27-28 and 57 stand rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claim 1 recites a limitation of "the electric field inducing window *formed in* a hole or slit in at least one of the passivation layer and the gate insulating layer" (emphasis added) that is not disclose in the original specification. According to the original specification and drawings, the electric field inducing window 51 is formed in the pixel electrode 13 (e.g. slit shaped) to expose a portion of the passivation layer 37. Therefore, the newly added limitation in claim 1 might change the scope of the invention and thus added a new matter in claim(s).

Response to Arguments

3. Applicant's arguments filed 04/06/2009 have been fully considered but they are not persuasive.

Applicants appear to believe that the limitation of “the electric field inducing window formed in a hole or slit in at least one of the passivation layer and the gate insulating layer” has been disclosed in the original specification (specification, page 9, lines 3-8). The Examiner respectfully disagrees with Applicant’s viewpoint, since the original specification just discloses “the electric field inducing window *formed by* patterning a hole or slit in the passivation layer³⁷ or pixel electrode 13 ... or entirely the gate insulator 35” (emphasis added). Therefore, such newly added limitation, as stated above, failing to comply with the written description requirement and adding a new matter as well.

Accordingly, the rejection of claims 1, 3, 20-25, 27-28 and 57 stand.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 2871

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
